
CITY OF SALEM
DEPARTMENT OF PLANNING AND COMMUNITY DEVELOPMENT
MEMORANDUM

TO: Members of the Salem City Council
FROM: Tom Daniel, Economic Development Manager
SUBJECT: Comprehensive Parking Plan Recommendations
DATE: April 25, 2011
CC: Mayor Kimberley Driscoll, Lynn Duncan, Cheryl LaPointe, Jason Silva, Parking Study Working Group

The Parking Study Working Group met on April 19, 2011 to review the feedback from the April 6, 2011 Committee of the Whole meeting as well as additional comments we had received.

As you will recall, the Committee of the Whole discussion was largely supportive of the Working Group's recommendations. There were some comments, questions, and suggestions made regarding pricing in two locations, time limits, enforcement, fines, residential parking, the garages, and passes.

At the Working Group meeting, we reviewed the Committee of the Whole comments and considered alternatives. After evaluating alternatives, the Working Group reaffirmed the recommendations as they had been presented with two changes.

The first adjustment is regarding time limits. While the Working Group believes the relative pricing model will be successful in achieving the Council's 15 percent availability objective, the Working Group recognizes this concept may be unsettling for some. To allay concerns, the Working Group is recommending the four hour time limit be applied to blocks (or street segments) and not just the specific metered space (e.g., a meter would read, "4 hour limit this block"). Thus, a driver that wished to park on-street for more than four hours would need to move to another block.

The second change is regarding the recommendation to add daytime supply on Federal, Lynde, and Crombie streets. The Working Group's recommendation was that the residential only zones would remain residential only from 5:00 PM to 8:00 AM weekdays and all day on weekends. However, from 8:00 AM to 5:00 PM weekdays they would be added to the general parking supply.

The Working Group now recommends that this recommendation be deferred until the resident sticker parking program is evaluated. While the Working Group continues to believe it would be beneficial to have this supply available to others during the day, it makes sense to address this recommendation within the context of the broader residential sticker program. Hawthorne Boulevard has a similar dynamic, and thus the Working Group is not recommending any changes to resident parking there at this time either. The attached map and ordinances have been revised to reflect this change.

Other concerns raised at the Committee of the Whole meeting related to the parking garages: the Museum Place Mall garage not feeling safe and concern that demand at the South Harbor garage may increase too much. The Parking Study Working Group agrees that improvements to the Museum Place Mall should be undertaken and this falls within the first recommendation, "Address existing concerns." Regarding concern about the demand at South Harbor garage increasing because of the revised pricing, the Working Group believes it makes sense to implement the recommended pricing and adjust as needed. Through active management, we can respond to changes in utilization and adjust accordingly.

At the Committee of the Whole meeting, the question was raised as to whether or not the passes at the garage could work in surface lots. This would be challenging to implement in terms of enforcement and would require different technology. Fundamentally, however, we think this would not support the objective of having 15 percent availability per block face.

In response to another Committee question, our consultant has prepared a list of other places where they have implemented similar parking reform recommendations. The specific recommendations differ by location, as they are tailored to the local circumstances, but the approach and general principles tend to be the same.

Implemented:

- Seattle South Lake Union, WA – demand-responsive parking pricing
- Walnut Creek, CA – demand-responsive parking pricing; surplus to transit
- Davenport, IA – demand-responsive parking implemented
- Glendale, CA – demand-responsive parking pricing; permit districts
- Ann Arbor, MI – unbundling & public/private sharing; on-street revenue dedicated to new transit
- Brooklyn, NY – resident parking program expanded
- Ithaca, NY – in-lieu fees implemented
- Needham, MA – in-lieu fees implemented
- Reading, MA – time-limits lengthened
- Tacoma, WA – implemented paid parking downtown

Others working on implementation plans:

- Union City, CA – demand-responsive parking pricing
- Ithaca, NY – demand-responsive parking pricing
- Nantucket, MA – demand-responsive parking pricing; permitting
- Haverhill, MA – demand-responsive parking pricing; permitting; surplus to improvements
- Silver Spring, MD – improved in-lieu system
- Winchester, MA – demand-responsive parking pricing

Lastly, as a reminder, at the Committee of the Whole meeting we created a "Parking Lot" of issues that are beyond the scope of the study and Working Group's recommendations. The Parking Lot issues are:

- tour buses;
- snow emergencies;
- residential passes program/cost; and
- construction workers.

I look forward to discussing the revised recommendations with you at the Committee of the Whole meeting on Tuesday, April 26, 2011.

Attachment 1: Map of the Recommended System

The following map visually illustrates the changes presented in Attachment 2: Traffic Ordinance Revisions.

Please note: The numbers on the map indicate the quantity of parking spaces in each location. The size of the on-street shapes is not necessarily to scale; however, the quantity is correct.

Attachment 2: Traffic Ordinance Revisions

City of Salem

In the year two thousand and eleven

An Ordinance to amend an Ordinance relative to traffic, parking penalties, parking prohibitions, parking meters and tow-away regulations

Be it ordained by the City Council of the City of Salem, as follows:
